

Course No: DMEC1302  
Course Title: Anatomy and physiology1  
Date:09/11/2013  
No. of Questions: 3  
Time: 1 hour

University of Palestine

Mid term Exam  
First Term 2013/2014  
Total Grade:20 Marks

Lecturer Name: Dr. Said Hassouna  
Student No.: \_\_\_\_\_  
Student Name: \_\_\_\_\_  
College Name: \_\_\_\_\_  
Grade No:101

---

**(Q1) Put (t) or (f) in the following : (5marks)**

- 1\* longitudinal plane divide the body into superior and inferior .
- 2\* the blood is one type of specialized connective tissues.
- 3\* the longest part of pancrease is the head.
- 4\* lateral direction is away from surface of body.
- 5\* transitional epithelium is called uroepithelium

**(Q2) Define the following anatomical terms :**

- 1\* The cells **(10marks)**
- 2\* Connective tissue fibers
- 3\* mast cells
- 4\* histology
- 5\* The neuron
- 6\* Anatomy
- 7\* physiology
- 8\* simple epithelium
- 9\* Abdomen regions
- 10\*Layers of abdominal wall

**(Q3) Write abrief account about : (5marks)**

- 1\* types of muscular tissues.
- 2\* parts of large intestine .
- 3\* physiologie of pancrease.
- 4\* blood supply of stomach and deudenum .
- 5\* valves and septums of the heart.

**Good luck**
