## Question One: Multiple Choice

(10 Marks)

1) Which of the following considered as the benefits	s of Management Information Systems?	
a) Improve efficiency	b) Increase productivity	
c) a + b	d) None of these	
2) is (are) data that have been organized to have	-	
a) Information	b) Experience	
c) Knowledge	d) Data	
3) An organization's IT components include all of t		
a) a network	b) procedures	
c) application programs	d) a database	
4) Managing <b>payroll</b> is an example of a(n):		
a) Accounting Business Process	b) Production Business Process	
c) Human Resources Business Process	d) Marketing Business Process	
5) Business pressures on organizations are created	_	
a) Social factors	b) Political factors	
c) Economic factors	d) Changes in all of these will create business pressures.	
6) Data redundancy refers to:	•	
a) Storing data in a single central	b) Having copies of the same data in	
location.	multiple locations.	
c) Sharing data with others.  d) All of these.		
7) Which of the following is not a reason why mana a) New sources of data are created.	b) New systems are developed.	
u) Trew sources of data are created.		
c) The amount of data increases	d) All of these are reasons why managing	
′	d) All of these are reasons why managing data is difficult over time.	
c) The amount of data increases exponentially.  8) The data in a data warehouse:	data is difficult over time.	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter.	data is difficult over time.  b) are not available for users.	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.	data is difficult over time.  b) are not available for users. d) All of these.	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.  9) In the normalization, determining functional de	data is difficult over time.  b) are not available for users. d) All of these.  pendencies is part of the	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.  9) In the normalization, determining functional de a) first normal form (1NF)	data is difficult over time.  b) are not available for users. d) All of these.  pendencies is part of the b) second normal form (2NF)	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.  9) In the normalization, determining functional de a) first normal form (1NF) c) third normal form (3NF)	data is difficult over time.  b) are not available for users. d) All of these.  pendencies is part of the b) second normal form (2NF) d) fourth normal form (4NF)	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.  9) In the normalization, determining functional de a) first normal form (1NF)	data is difficult over time.  b) are not available for users. d) All of these.  pendencies is part of the b) second normal form (2NF) d) fourth normal form (4NF)	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.  9) In the normalization, determining functional de a) first normal form (1NF) c) third normal form (3NF)  10) The type of decision that can be made by following	data is difficult over time.  b) are not available for users. d) All of these.  pendencies is part of the b) second normal form (2NF) d) fourth normal form (4NF)	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.  9) In the normalization, determining functional de a) first normal form (1NF) c) third normal form (3NF)  10) The type of decision that can be made by following decision.	data is difficult over time.  b) are not available for users. d) All of these.  pendencies is part of the b) second normal form (2NF) d) fourth normal form (4NF)  ng a definite procedure is called a(n)	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.  9) In the normalization, determining functional de a) first normal form (1NF) c) third normal form (3NF)  10) The type of decision that can be made by following decision. a) structured	data is difficult over time.  b) are not available for users. d) All of these.  pendencies is part of the b) second normal form (2NF) d) fourth normal form (4NF) ng a definite procedure is called a(n) b) unstructured d) procedural	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.  9) In the normalization, determining functional de a) first normal form (1NF) c) third normal form (3NF)  10) The type of decision that can be made by following decision. a) structured c) semistructured	data is difficult over time.  b) are not available for users. d) All of these.  pendencies is part of the b) second normal form (2NF) d) fourth normal form (4NF) ng a definite procedure is called a(n) b) unstructured d) procedural	
c) The amount of data increases exponentially.  8) The data in a data warehouse: a) are purged constantly as new data enter. c) are loaded from different data sources.  9) In the normalization, determining functional de a) first normal form (1NF) c) third normal form (3NF)  10) The type of decision that can be made by following decision. a) structured c) semistructured  11) Which of the following information systems are	data is difficult over time.  b) are not available for users. d) All of these.  pendencies is part of the b) second normal form (2NF) d) fourth normal form (4NF) ng a definite procedure is called a(n) b) unstructured d) procedural

## **Question Two:** Answer Five (5) Questions Only

(20 Marks)

- 1. Can the terms data, information, and knowledge have different meanings for different people? Support your answer with examples.
- 2. Differentiate between a computer-based information system and an application program.
- 3. Discuss several ways in which IT impacts organizations.
- 4. Explain why IT is both a business pressure and an enabler of response activities that counter business pressures.
- 5. Describe the characteristics of a database.
- 6. List Three (3) Business Intelligence Applications for data analysis.

End of Questions *Good Luck*
