

Course No: NUTR 2207
Course Title: Maternal & Pediatrics Nutrition
Date: 11/01/2018
No. of Questions: (9)
Time: 2 hours
Using Calculator (No)

University of Palestine

Final Exam
2017/2018
Total Grade:

Instructor Name: Dr Mohammed Srouf
Student No.: _____
Student Name: _____
College Name: Pharmacy
Dep. / Specialist: Health & Nutrition
Using Dictionary (No)

Question One

Define the following terms:

1- Xerophthalmia

2- Malnutrition

3- PEM

4- Infant and young child feeding

5- Multiple micronutrient powders (MNPs)

Course No: NUTR 2207
Course Title: Maternal & Pediatrics Nutrition
Date: 11/01/2018
No. of Questions: (9)
Time: 2 hours
Using Calculator (No)

University of Palestine

Final Exam
2017/2018
Total Grade:

Instructor Name: Dr Mohammed Srouf
Student No.: _____
Student Name: _____
College Name: Pharmacy
Dep. / Specialist: Health & Nutrition
Using Dictionary (No)

6- Large-scale fortification

7- BEST

8- Cretinism

9- Intermittent dose of iron

10- Comprehensive implementation action plan on maternal, infant and young children nutrition

Course No: NUTR 2207
Course Title: Maternal & Pediatrics Nutrition
Date: 11/01/2018
No. of Questions: (9)
Time: 2 hours

Dep. / Specialist: Health & Nutrition
Using Dictionary (No)

Question Two:

Please put (T) for true answers and Put (F) for false answers:

- 1) Wasting represents long term growth retardation ().
- 2) Measurement of severe malnutrition occurs with growth charts ().
- 3) Nutrition-sensitive approaches are actions that have a direct impact on the prevention and treatment of undernutrition, in particular during the 1,000 days covering pregnancy and the child's first two years.().
- 4) According to WHO vitamin A supplementation is recommended to infant and young children age 5-59 months as public health intervention ()
- 5) Nutrition-sensitive approaches involve other sectors in indirectly addressing the underlying causes of undernutrition ()
- 6) Cretinism occurs with severe infancy iodine deficiency ()
- 7) Vitamin D supplementation is recommended during in pregnancy to prevent the development of pre-eclampsia and its complications. ()
- 8) The arsenal of nutritional “well-being weapons” includes a combination of breastfeeding and vitamin A supplementation, coupled with enduring solutions, such as promotion of vitamin A-rich diets and food fortification. ()
- 9) Iodine deficiency can be easily prevented by ensuring that salt consumed by households is adequately iodized ()
- 10) Rachitic children show reduced bone growth, are anaemic, and prone to respiratory infections ()

Using Dictionary (No)

Question Three:

Please select the best answer:

1) Different combinations of many aetiological factors can lead to PEM in children.

.....except:

- A. Role of free radicals & aflatoxin;
- B. Biological factors;
- C. Social and economic factors;
- D. Physical factors i.e. Radiation;

2) Significant biochemical and metabolic findings in kwashiorkor except:

- A. Hypoalbuminemia;
- B. Hypotonia;
- C. Hypoproteinemia;
- D. Hypoglycemia;

3) Interventions to improve maternal nutrient intake include the following except :

- A. Supplementation with iron;
- B. Folic acid;
- C. Psychological stress;
- D. Multiple micronutrients;

4) WASH program in schools including improvement of the following except :

- A. Drinking water.
- B. Hygiene.
- C. Food distribution.
- D. Sanitation.

5) Groups at risk of VAD are those who have:

- A. Diets lack vitamin A
- B. Who taken statin medication
- C. Frequent infections
- D. High needs
- E. All the above
- F. A+B+C

Instructor Name: Dr Mohammed Srour
Student No.: _____
Student Name: _____
College Name: Pharmacy
Dep. / Specialist: Health & Nutrition
Using Dictionary (No)

- 6) Causes of Iodine Deficiency...
- A. Mountainous areas
 - B. Culturally induced behavioral change
 - C. A+B
 - D. None of the above
- 7) people are more at risk of vitamin D deficiency, and so are recommended to take vitamin D supplements routinely...
- A. pregnant and breast-feeding women
 - B. babies and young children aged 6 months to 5 years
 - C. people aged 65 and over
 - D. darker skin, and for people with certain gut, liver or kidney diseases.
 - E. A+C+D
 - F. All the aboe

Question Four:

A) Explain how *age of host* can play role in *PEM etiology*?

Course No: NUTR 2207
Course Title: Maternal & Pediatrics Nutrition
Date: 11/01/2018
No. of Questions: (9)
Time: 2 hours
Using Calculator (No)

University of Palestine

Using Dictionary (No)

Question Five:

Explain the following:

- **Why legalization considered as one of key component in IYCF strategy.**

.....
.....
.....
.....
.....

- **Why Low birth weight LBW infant are more susceptible to be iron deficient.**

.....
.....
.....
.....

- **Why *WHO* not recommended iodine supplementation to young infant aged 0-6 months.**

.....
.....
.....
.....

Instructor Name: Dr Mohammed Srour
Student No.: _____
Student Name: _____
College Name: Pharmacy
Dep. / Specialist: Health & Nutrition
Using Dictionary (No)

- Why we never normally give a high dose of vitamin A to a woman, and what is the alternative solution to get adequate vitamin A?

.....
.....
.....
.....
.....

- Why the body some time is unable to make enough vitamin D.

.....
.....
.....
.....
.....
.....
.....
.....
.....

Question Six:

A) Infant formula comes in three basic types, write them.

Course No: NUTR 2207
Course Title: Maternal & Pediatrics Nutrition
Date: 11/01/2018
No. of Questions: (9)
Time: 2 hours
Using Calculator (No)

University of Palestine

Final Exam
2017/2018
Total Grade:

Instructor Name: Dr Mohammed Srour
Student No.: _____
Student Name: _____
College Name: Pharmacy
Dep. / Specialist: Health & Nutrition
Using Dictionary (No)

B) Mention the types of malnutrition.

Question Seven:

A) Symptoms of *gastroesophagal reflux* in infants include:

A) Compare between home prepared and commercial baby food

Course No: NUTR 2207
Course Title: Maternal & Pediatrics Nutrition
Date: 11/01/2018
No. of Questions: (9)
Time: 2 hours
Using Calculator (No)

University of Palestine

Final Exam
2017/2018
Total Grade:

Instructor Name: Dr Mohammed Srour
Student No.: _____
Student Name: _____
College Name: Pharmacy
Dep. / Specialist: Health & Nutrition
Using Dictionary (No)

- B) You are iNGOs nutrition officer, and it's required from you to design an intervention to prevent the micronutrient deficiency among children and pregnant women in Gaza strip, upon what you learned from course sessions, how you can address those current problems taking into consideration the program success factors.**

Course No: NUTR 2207
 Course Title: Maternal & Pediatrics Nutrition
 Date: 11/01/2018
 No. of Questions: (9)
 Time: 2 hours
 Using Calculator (No)

 2017/2018
 Total Grade:

Instructor Name: Dr Mohammed Srouf
 Student No.: _____
 Student Name: _____
 College Name: Pharmacy
 Dep. / Specialist: Health & Nutrition
 Using Dictionary (No)

Question Eight:

Complete the missing parts

Causes of child malnutrition

Course No: NUTR 2207
 Course Title: Maternal & Pediatrics Nutrition
 Date: 11/01/2018
 No. of Questions: (9)
 Time: 2 hours
 Using Calculator (No)

University of Palestine

Final Exam
 2017/2018
 Total Grade:

Instructor Name: Dr Mohammed Srouf
 Student No.: _____
 Student Name: _____
 College Name: Pharmacy
 Dep. / Specialist: Health & Nutrition
 Using Dictionary (No)

Question Nine:

Q.9 put the righteous number of A column in the front of B column in Answer place

A	Answer	B
1-UNDERWEIGHT		A severely malnourished child with features of both marasmus and Kwashiorkor.
2-STUNTING		Diarrhea management
3-WASTING		Height for age – height compared to a reference population of the same age.
4-Kwashiorkor		Represents simple starvation, the body adapts to a chronic state of insufficient caloric intake
5-Marasmic-kwashiorkor		pernicious anemia
6-Marasmus		It is the body’s response to insufficient protein intake but usually sufficient calories for energy
		The suggested scheme for supplementation is 1.5–2 g daily, with the total dose divided into three doses , preferably taken at mealtimes
		Weight for age – weight compared to age in a reference population
		Weight for height – weight compared to a reference population of the same height.

End of Questions
Good Luck
