“Every day the world emphasizes new technologies, therefore learning, practicing, developing become highly required for Tech specialists to keep position in the trace of CS.”

## EXPERIENCE

**OCT 2, 2021 – NOW**

**ASSISTANT TEACHER, UNIVERSITY OF PALESTINE**

Last semester at the University of Palestine, I had lectured two laboratories related to AI area. -

Intro to Linux OS Lab: students have learned how to launch virtual OS (Ubuntu 20.04 LST) in virtual Box and practice basic Linux commands.

- Intro to Data Science Lab: students have learned how to develop Regression ML Algorithm in Google Colab with Python  
Intro to AI Lab: students have learned how to develop CNN Model that classify which appears in Dog or Cat in Google Colab with Python
- Intro to Image Processing Lab: students have learned how to create images, transform color systems, manipulate size, and do some filters to enhance image's resolution in PyCharm with Python, Sci-image, OpenCV libraries.
- Advanced Database Lab: students had a project to simulate a website as a database management system and they applied features like stored procedures, functions, triggers to their database in Microsoft SQL Studio.

## EDUCATION

**FEB 2021**

**BACHELOR OF INFORMATION TECHNOLOGY**, UNIVERSITY OF PALESTINE

Actually, I have scored a 91.3 % GPA in Multimedia specialization. My graduate project was a sample of a mobile application called DAWAY App that's applied AI technology.

**JUL 2015**

**TAWJEHEI**, AILA BOON SECONDARY SCHOOL FOR GIRLS

In secondary school, I got an 88.2% GPA in science.

## SKILLS

- Intermediate Python Coding
- Intermediate Linux Command
- Intermediate SQL
- Basic APIs Integrity
- Git and GitHub
